# DHIVYA DHARSHINI C

## DevOps Engineer

+91 63844 51811 | Chennai | dhivyadharshinic11@gmail.com

## ABOUT ME

**DevOps Engineer** with **5+ years** of **IT experience** in designing, automating, and managing cloud infrastructure and **CI/CD pipelines**. Hands-on expertise in **AWS, Linux, Docker, Kubernetes, Jenkins**, and **Infrastructure as Code**. Proven ability to support production systems, implement scalable deployments, and improve reliability, security, and operational efficiency.

## SKILLS

**Amazon Web Services (AWS)**
- EC2, S3, IAM, VPC, ALB/NLB
- Auto Scaling, CloudWatch
- RDS, ECR, EKS
- CloudFormation, AWS WAF, CloudFront

**DevOps & CI/CD**
- CI/CD Pipelines
- Jenkins
- Azure DevOps Pipelines
- GitHub Actions
- GitHub / GitLab
- Build & Release Automation
- Blue-Green Deployments
- Rolling Deployments

**Configuration Management**
- Ansible (Playbooks – Basic)

**Scripting & Automation**
- Shell Scripting (Bash), Java
- Python, Node JS

**Networking**
- TCP/IP Basics
- DNS
- Load Balancing
- Firewalls & Network Security

**Microsoft Azure**
- Azure Virtual Machines
- Azure Storage Accounts
- Azure Virtual Network (VNet)
- Azure Load Balancer
- Azure Active Directory (AAD)
- Azure Kubernetes Service (AKS)
- Azure Monitor & Log Analytics
- Azure DevOps

**Containerization & Orchestration**
- Docker
- Docker Compose
- Kubernetes (EKS / AKS / GKE)
- Kubernetes YAML Manifests
- Helm (Basic)

**Operating Systems**
- Linux (Ubuntu, Amazon Linux, RHEL)
- Linux System Administration
- User & Permission Management
- Process & Service Management

**Security**
- IAM & RBAC (AWS / Azure / GCP)
- AWS Security Groups
- SSL / TLS Certificates
- Secrets Management (Basic)

**Google Cloud Platform (GCP)**
- Compute Engine
- Cloud Storage
- Virtual Private Cloud (VPC)
- Google Kubernetes Engine (GKE)
- Cloud IAM
- Cloud Monitoring & Logging

**Infrastructure as Code (IaC)**
- Terraform
- Infrastructure as Code (IaC)
- CloudFormation
- ARM Templates (Basic)

**Monitoring & Logging**
- Prometheus
- Grafana
- ELK Stack (Basic)
- CloudWatch
- Azure Monitor
- GCP Cloud Monitoring
- Log Monitoring & Alerting

**Build & Code Quality Tools**
- Maven
- SonarQube

## WORK EXPERIENCE

**8 APRIL 2025 – 17 NOV 2025** | **ORGANIZATION: STEWART** | **PROJECT: RBC BANK, US**

**ROLE: IT SECURITY ENGINEER, NAVI MUMBAI**

- Implemented and supported **security controls** for banking applications and cloud infrastructure to meet regulatory and compliance standards.
- Managed **identity and access management (IAM)**, including user access reviews, role-based access control, and privilege management.
- Monitored security events and alerts using **SIEM tools** and performed initial investigation and triage of security incidents.
- Assisted in **vulnerability management** activities including vulnerability scanning, analysis, and remediation tracking.
- Supported **network security controls** such as firewalls, security groups, NACLs, and access rules across environments.

- Worked on **SSL/TLS certificate management** for secure communication between banking applications and external services.
- Collaborated with DevOps, application, and infrastructure teams to implement **secure deployment practices**.
- Participated in **incident response activities**, root cause analysis, and preparation of incident reports.
- Assisted in implementing **security best practices** aligned with banking compliance requirements (ISO 27001, SOC, internal security policies).
- Maintained security documentation, access logs, and audit evidence for **internal and external audits**.
- Supported security **monitoring and compliance controls** for critical banking applications to ensure data confidentiality, integrity, and availability.
- Configured **VPN connectivity,load balancers, and firewall rules** to enable secure communication between on-prem infrastructure and cloud environments while ensuring high availability and network security
- Conducted **log reviews and audit trail validation** to support regulatory and forensic requirements.
- Assisted in enforcing **data protection and privacy controls** aligned with banking security policies and GDPR guidelines.

---

**1 DEC 2022 - 15 JULY 2024**

**ORGANIZATION: SALEM TECHNOLOGIES PRIVATE LIMITED, CHENNAI**
**ROLE: DEVOPS ENGINEER**

**PROJECT: VENDING MACHINE**

- Configured auto-scaling and optimized VM performance using **Azure Compute resources.**
- Implemented update and fault domains to minimize downtime during maintenance and unexpected failures.
- Developed & deployed Java-based application on linux system and different cloud platforms.
- Utilized **GitHub** for version control, collaboration, & CICD pipeline management, ensuring smooth and efficient development workflows
- Configured pull requests, code reviews and CI/CD integration with **Azure Pipelines**. Configured Kanban and Scrum boards for tracking work items, epics, and backlogs.
- Configured and utilized **Cloud Logging** and Monitoring to collect and analyze application and infrastructure logs and metrics, enabling proactive issue detection and resolution.
- Designed, Implemented, Optimized **PostgreSQL databases**, ensuring high performance, scalable & secure data storage & retrieval.
- Developed and deployed serverless functions using **Cloud Functions**, automating tasks and integrating with other **GCP** services.
- Implemented secure storage and retrieval of sensitive data using **Secret Manager**, protecting application credentials and API key.
- Designed and deployed scalable **Virtual Machine Based environments** to support application development and deployment.
- Developed and deployed Azure-Based cloud solutions, utilizing services such as **Azure Kubernetes Services (AKS), Azure storage, & Azure Security center.**
- Implemented YAML-based pipelines for **Infrastructure-as-code (IAC)** deployments.
- Configured **SonarQube** for Code Quality Analysis and worked as **SonarQube administrator, Jenkins administrator, MySQL administrator** & **Azure DevOps administrator**
- Containerized complex applications and microservices using **Docker**, ensuring consistent deployment across diverse environments.
- Deployed the code in **Infrastructure as code (IAC**) across multiple cloud provider.
- Implemented **Docker** security best practices, including image scanning, vulnerability management, and secure container configurations.
- Implemented **Kubernetes** cluster upgrades and patching, minimizing downtime and maintaining security compliance.
- Configured **Kubernetes** resource requests and limits to optimize resource utilization and prevent application outages.
- Implemented **high-availability and disaster recovery (HA/DR)** strategies for banking workloads across cloud environments to meet strict uptime and resiliency requirements.
- Managed on-prem virtualized environments using **VMware and Hyper-V,** configuring virtual networks, resource allocation and integrating workloads with Azure and Aws cloud infrastructure

**31 JAN 2020 - 3 SEP 2022**

**NTT DATA INFORMATION PROCESSING SERVICES PRIVATE LIMITED**
**ROLE: DEVOPS ENGINEER**

**PROJECT: FIDELITY & GUARANTY LIFE INSURANCE COMPANY**

- Automated the provisioning and configuration of cloud resources using **Ansible** modules for AWS & GCP.
- Implemented idempotent **Ansible** playbooks to ensure consistent and repeatable infrastructure configurations across diverse environments.
- Deployed and configured Prometheus for collecting and storing time-series metrics from applications and infrastructure.
- Configured Prometheus Alert Manager to send alerts based on predefined thresholds and rules.
- Designed and deployed cloud based system on **Amazon Web Services** (AWS) utilizing services such EC2 &S3.
- Managed local and remote **Maven** repositories, ensuring access to required dependencies and artifacts.
- Assisted in cloud cost optimization by **analyzing** resource utilization and removing unused infrastructure.
- Integrated Prometheus metrics with **Grafana dashboards** for real-time visibility into application and infrastructure performance.
- Supported **CI/CD** pipelines by **integrating** build artifacts with cloud infrastructure provisioning workflows.
- Configured and managed **SonarQube** for static code analysis, identifying code quality issues, vulnerabilities, and code smells.
- Utilized **SonarQube** to identify and track security vulnerabilities in code, prioritizing remediation efforts.
- Implemented **Docker** container monitoring and logging, using tools to track performance and identify potential issues.
- Configured **Docker** networking and storage solutions, enabling seamless communication and data persistence for containerized applications.
- Implemented **role-based access control (RBAC)** and least-privilege policies for cloud resources.
- Assisted in **container image optimization**, reducing image size and improving deployment times.
- Worked closely with application teams to **troubleshoot performance bottlenecks** in cloud and container environments.
- Implemented **backup and recovery strategies** for critical cloud workloads.
- Ensured **high availability and fault tolerance** by configuring auto-scaling and load balancing concepts.
- Documented cloud architectures, monitoring setups, and operational procedures for knowledge transfer.
- Supported **mission-critical insurance applications** with high availability and strict uptime requirements.
- Ensured infrastructure compliance with **security and regulatory standards** common to financial and insurance domains.
- Assisted in securing **customer data and policy information** through controlled access and monitoring.
- Supported systems handling **high-volume transactional** and **policy-processing workloads**.

## EDUCATION

**(2016 - 2019)**
**BSC - COMPUTER SCIENCE**
M.M.E.S. Women's Arts and Science College, Chennai

**(2015 - 2016)**
**HSC**
Sri Ramakrishna Matriculation Higher Secondary School, Arcot

**(2013 - 2014)**
**SSLC**
Sri Ramakrishna Matriculation Higher Secondary School, Arcot

## DECLARATION

I solemnly declare that the information stated above is true and correct to the best of my knowledge and belief.

**Regards,**
**DHIVYA DHARSHINI C**
